

HIBRIX

Pasture & Lawn

Hibrix Pasture and Lawn has been designed to maximize the growth and nutritional value of feed lots. This coupled with the Hibrix rain utilization and soil restoration qualities puts graziers and ground keepers in the best position to weather environmental adversities.

- ✓ Minimises leaching and run off.
- ✓ Increased nutrient density
- ✓ Increased water utilisation efficiency.
- ✓ Happier healthier stock
- ✓ Reduced cost

Once applied, Hibrix will lay dormant until sufficient amounts of water are present to activate the microbial process.

Application rates

Standard Application	1-2 litres per hectare. Dilute with water to a minimum ratio of 1:50.	Apply at onset of rain. 1 - 2 applications per year. Suitable for fertigation.	Ensure Hibrix is watered in before grazing. Avoid contact with skin and eyes. If swallowed seek medical attention.
Remedial Application for Damaged pasture	2-3 litres per hectare. Dilute with water to a minimum ratio of 1:50.	Apply at onset of rain. 1 - 2 applications per year. Suitable for fertigation.	

Macro and Micro-nutrients found in Hibrix are all derived from plant sources. The major difference between plant derived minerals and rock derived minerals is availability. Plant derived minerals are immediately available for absorption
