

HIBRIX

Tree & Vine Care

Hibrix Tree Care has been designed to maximize the quality and quantity of fruiting trees. Trees inoculated with Hibrix Tree Care have shown accelerated new growth, increased resilience to pests and higher tolerance to heat and frost.

- ✓ Maximise Yield
- ✓ Minimise cost
- ✓ Improve natural defense against pests
- ✓ Increased resilience to frost
- ✓ Increased resilience heat stress

Trees treated with Hibrix Tree Care have shown visible growth acceleration within three weeks.

Application rates

Standard Application	3 - 4 litres per hectare. Dilute to minimum of 1:50 ratio Suitable for fertigation.	Apply direct to ground around root zone. 1 - 2 applications per year.	Apply first application at the start of the growing cycle. Avoid contact with skin and eyes. If swallowed seek medical attention.
Remedial Application	Up to 6 litres per hectare. Dilute to minimum of 1:75 ratio. Suitable for fertigation.	Apply direct to ground around root zone. 1 - 2 applications per year.	

Hibrix is used in viticultural to help increase brix levels by 25%. Similar brix increases are detectable in all fruit bearing trees. Changes of brix levels in vines are measurable 1 - 2 weeks after application. Changes of brix levels in fruit bearing trees are measurable 2 - 3 weeks after application.
